

## Claims

1. Party game device including a games' board and a number of flat playing pieces, wherein the games' board comprises a number of playing sections adjusted to the dimensions of the playing pieces, the playing sections having first surfaces comprising first supporting faces for the playing pieces,  
5 wherein at least at one side the playing pieces are provided with second surfaces comprising second supporting faces for supportive contact with the first supporting faces, wherein the first and second surfaces comprise edge surfaces situated at the edges of the playing pieces which edge surfaces are spaced apart.  
10
2. Party game device according to claim 1, wherein the edge surfaces are substantially circumferential, preferably fully circumferential.
3. Party game device according to claim 1 or 2, wherein the first and/or  
15 second supporting faces form a contiguous support surface within the edge surfaces.
4. Party game device according to claim 1, 2 or 3, wherein the edge surfaces of the first surfaces are vertically recessed with respect to other surfaces of  
20 the first supporting faces.
5. Party game device according to claim 1, 2 or 3, wherein the edge surfaces of the second surfaces are vertically recessed with respect to other surfaces of the second supporting faces.  
25
6. Party game device according to any one of the preceding claims, wherein the games' board is provided with boundaries between the playing sections.

7. Party game device according to claim 6, wherein the boundaries form raised edges.

5 8. Party game according to any one of the preceding claims, wherein the first and/or second supporting faces are bounded by a circumferential edge which is shaped similarly to the circumferential edge of the playing sections and/or the circumferential edge of the playing pieces, respectively.

10 9. Party game device according to any one of the preceding claims, wherein the playing pieces have a polygonal circumference.

10. Party game device according to claim 9, wherein the playing pieces have a hexagonal circumference.

15

11. Games' board suitable and intended for a party game device according to any one of the preceding claims.

12. Playing piece suitable and intended for a party game device according to  
20 any one of the preceding claims.

13. Party game device including a games' board and a number of flat playing  
pieces, wherein the games' board comprises a number of playing sections  
adjusted to the dimensions of the playing pieces, the playing sections having  
25 first surfaces comprising first supporting faces for the playing pieces,  
wherein at least at one side the playing pieces are provided with second  
surfaces comprising second supporting faces for supportive contact with the  
first supporting faces, wherein the first and second surfaces are formed for  
allowing the second supporting face to tilt with respect to the first  
30 supporting face.

14. Party game device according to claim 13, wherein the first supporting

faces form an elevation in the first surfaces, which elevation preferably is surrounded by a lowered step.

15. Party game device according to claim 13, wherein the second supporting  
5 faces form an elevation in the second surfaces, which elevation preferably is surrounded by a lowered step.

16. Party game device according to claim 15, wherein on both sides of the  
10 playing piece such second surfaces have been formed.

17. Party game device provided with one or more of the characterising  
measures described in the attached description and/or shown in the attached  
drawings.

15 18. Games' board provided with one or more of the characterising measures described in the attached description and/or shown in the attached drawings.

19. Playing piece provided with one or more of the characterising measures  
described in the attached description and/or shown in the attached drawings.
